WESTINGHOUSE, PIONEER MOTOR BEARING SIGN REPAIR LICENSING AGREEMENT

ORLANDO, Fla., June 12 -- Westinghouse Electric Corporation's power generation business unit announced it has signed a licensing agreement naming Pioneer Motor Bearing Co., South San Francisco, Calif., as the exclusive repair organization for certain of its babbitted products.

Through the agreement, Pioneer Motor Bearing becomes the authorized repair organization for all Westinghouse babbitted products designed for land based steam turbines over 60 MW installed in the United States. Pioneer Motor Bearing will have the right to market repair procedures, under license from Westinghouse, directly to electric utilities.

Pioneer Motor Bearing is a leading supplier of babbitted products for rotating and reciprocating machinery used in steam turbines, gas turbines, compressors, gearboxes, pumps and large electric motors and fans. The company has provided high quality babbitt bearing repair services for almost 70 years.

Westinghouse Electric Corporation, a technology-based, diversified corporation, was instrumental in establishing steam turbine generator technology in the U.S., and has successfully designed, manufactured and installed steam turbine generators for over a century.
